

POSTDOCTORAL CANDIDATE
Carbon and nitrogen in grassland ecosystems

We are currently looking for candidates for a 3-year postdoctoral position to develop research on plant ecophysiology, soil-plant interactions, and carbon and nitrogen dynamics in grassland ecosystems in the Pyrenees within the context of the CarboEurope-IP project. The position is based at the Technological Forestry Centre of Catalonia in Solsona (Eastern Pyrenees), Spain.

Requirements:

- To have a PhD for less than 3 years or be in the last months before finishing the thesis.
- Background on soil-plant relationships, plant ecophysiology, soil microbial ecology or grazing/forage studies is desirable.

The selected candidate will have to apply to a competitive call. Salary and social benefits are provided according to Spanish Science Foundation rules.

To apply, send electronically a CV, description of research interests, and the names and contact information of at least three references before 18 March to:

M. Teresa Sebastià
